

# **STREAMLINE**®

*Van mounted systems*

## **STREAMLINE**® WATER FILTRATION SYSTEMS

are designed to be used for window cleaning, boat cleaning, bus cleaning etc. where a spot-free finish is essential...

To achieve this, the system has a series of filters to produce pure water with a reading of 0ppm.

All van mounted systems are fitted in-house at Varitech Systems. This ensures every system is made and fitted to customers' specifications.

If you are in a soft water area you would only require a resin bead system, and if you are in a hard water area you would require a full Reverse Osmosis system.

As all our systems are made bespoke to our customers' requirements, you can be sure of having a system that meets your demands.

**Saving time... Saving money!**
